الجزء الثاني: كل الشاشات

Part two: every screen, one by one

متوفرة بالعربية

Clinical Command القيادة السريرية 001

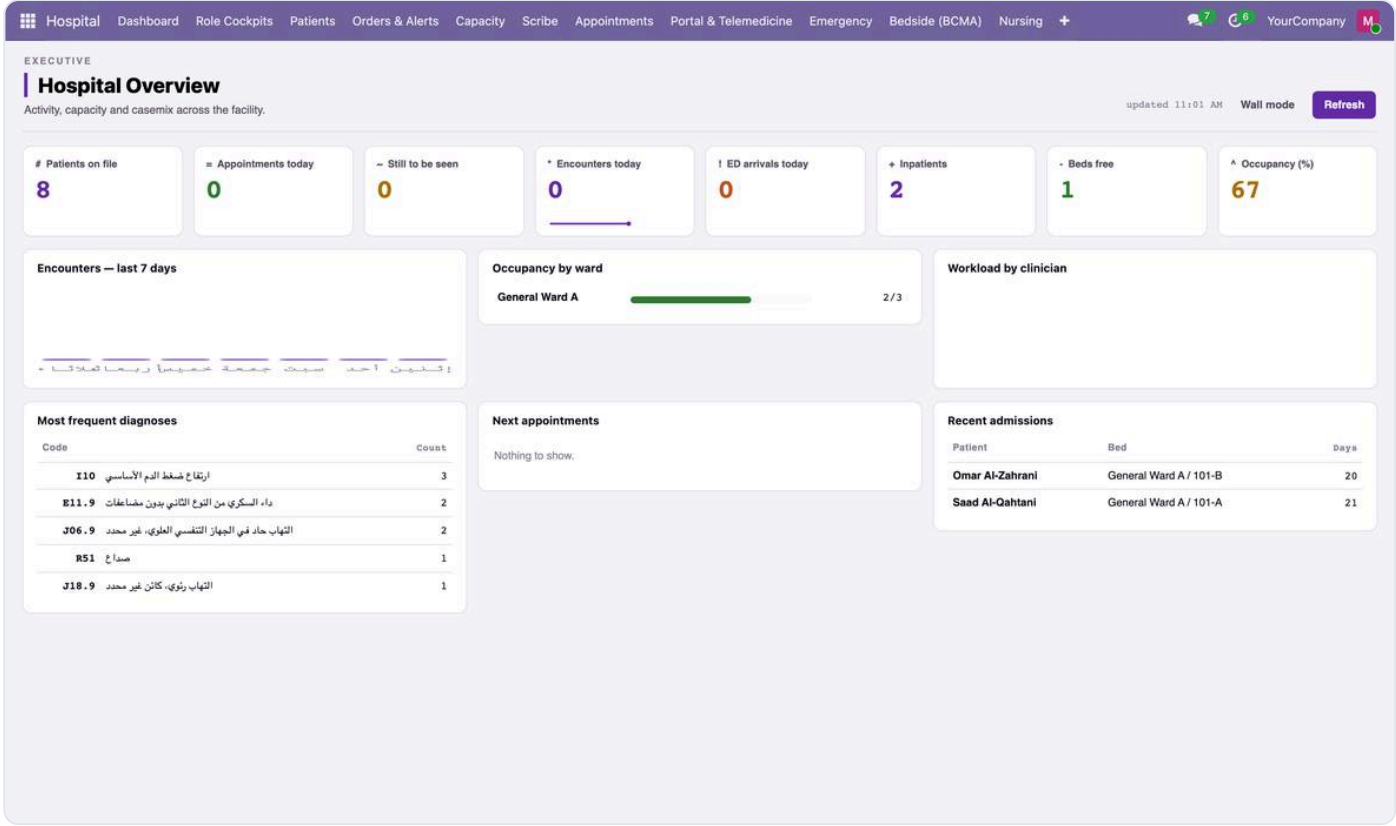

English

عربي

The heart of the system: every active order and every alert on one screen -- critical alarms, STAT orders, orders blocked by decision support, and the acknowledgement rail. Each alert is addressed to a named human, and anything unacknowledged escalates on its own through three levels, on a clock.

قلب النظام. كل أمر نشط وكل تنبيه في شاشة واحدة: الإنذارات الحرجة، الأوامر العاجلة، الأوامر الموقوفة بقرار دعم القرار، وسكة التنبيهات التي تنتظر الإقرار. كل تنبيه موجّه إلى شخص بالاسم، وأي تنبيه لا يُقرّ به يتصعدّ وحده عبر ثلاثة مستويات وعلى ساعة.

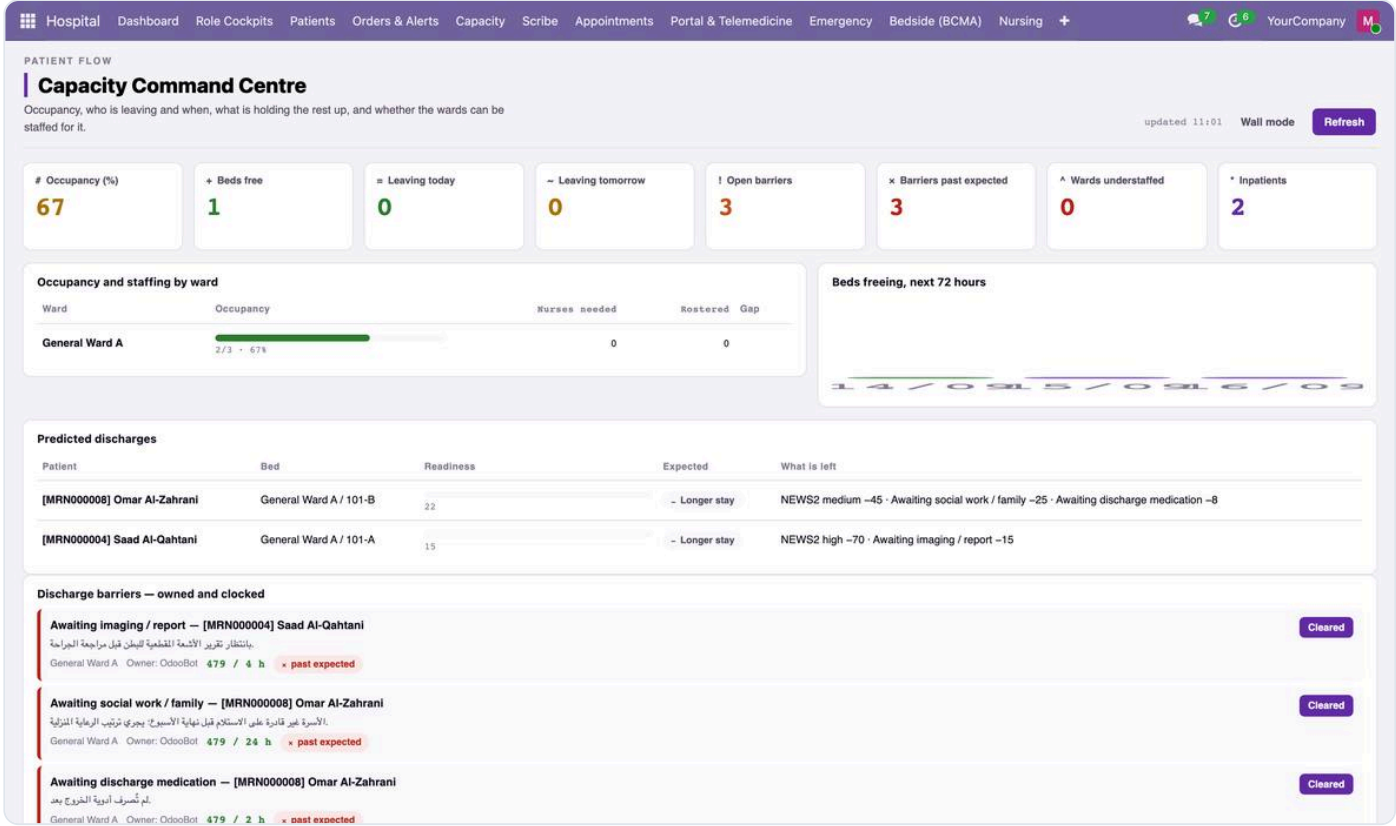

English

The overview: daily activity, occupancy, the most frequent diagnoses, upcoming appointments and recent admissions.

عربي

النظرة العامة: النشاط اليومي، الإشغال، التشخيصات الأكثر تكراراً، المواعيد القادمة، والتنويمات الأخيرة.

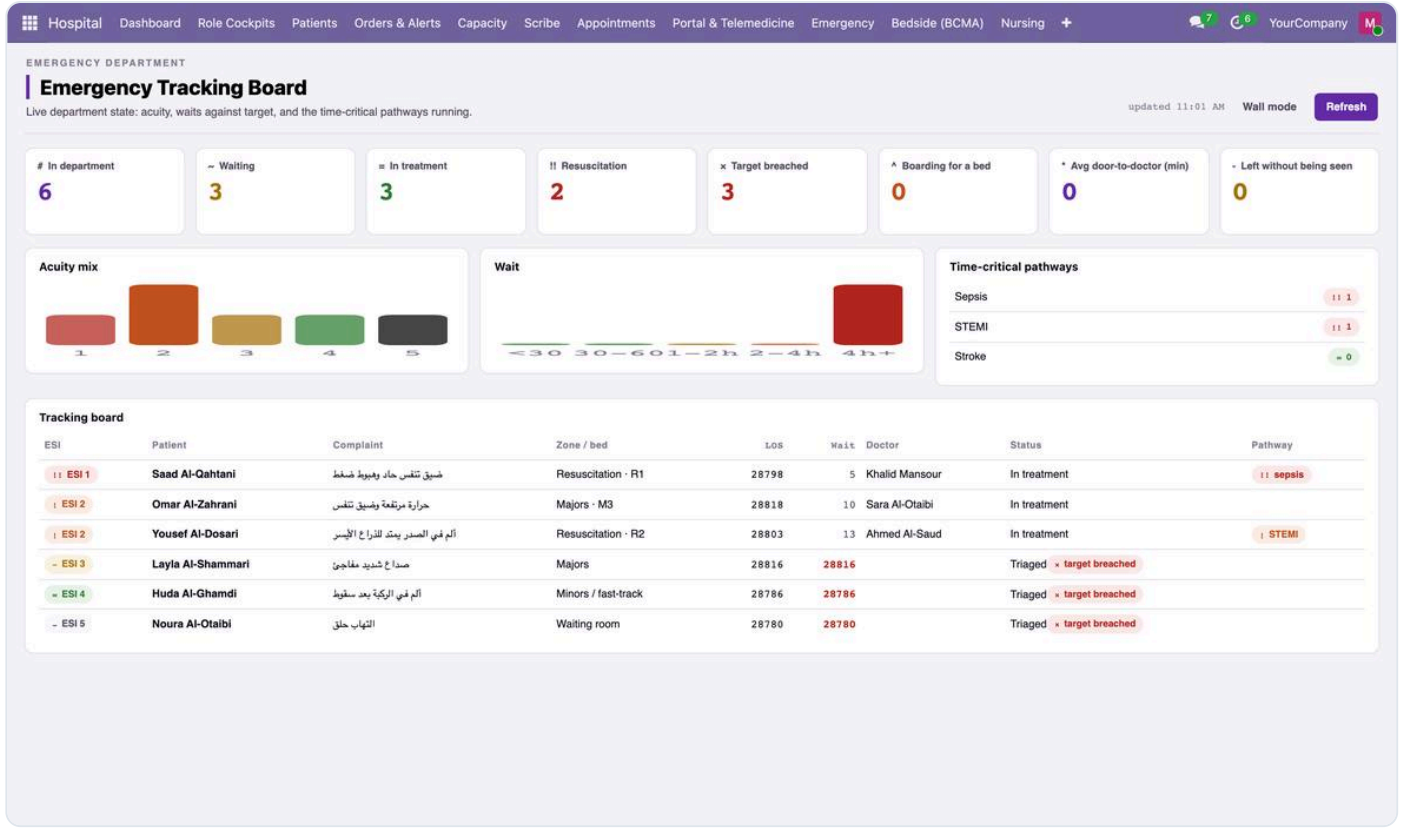

English

عربي

Occupancy, who leaves today and tomorrow, and the discharge barriers -- each owned and on a clock. It answers the question that blocks a hospital: where can this patient go?

الإشغال، من يخرج اليوم وغداً، ومعوقات الخروج المملوكة والمؤقتة. يجيب عن السؤال الذي يعطل المستشفى: أين يمكن أن يذهب هذا المريض؟

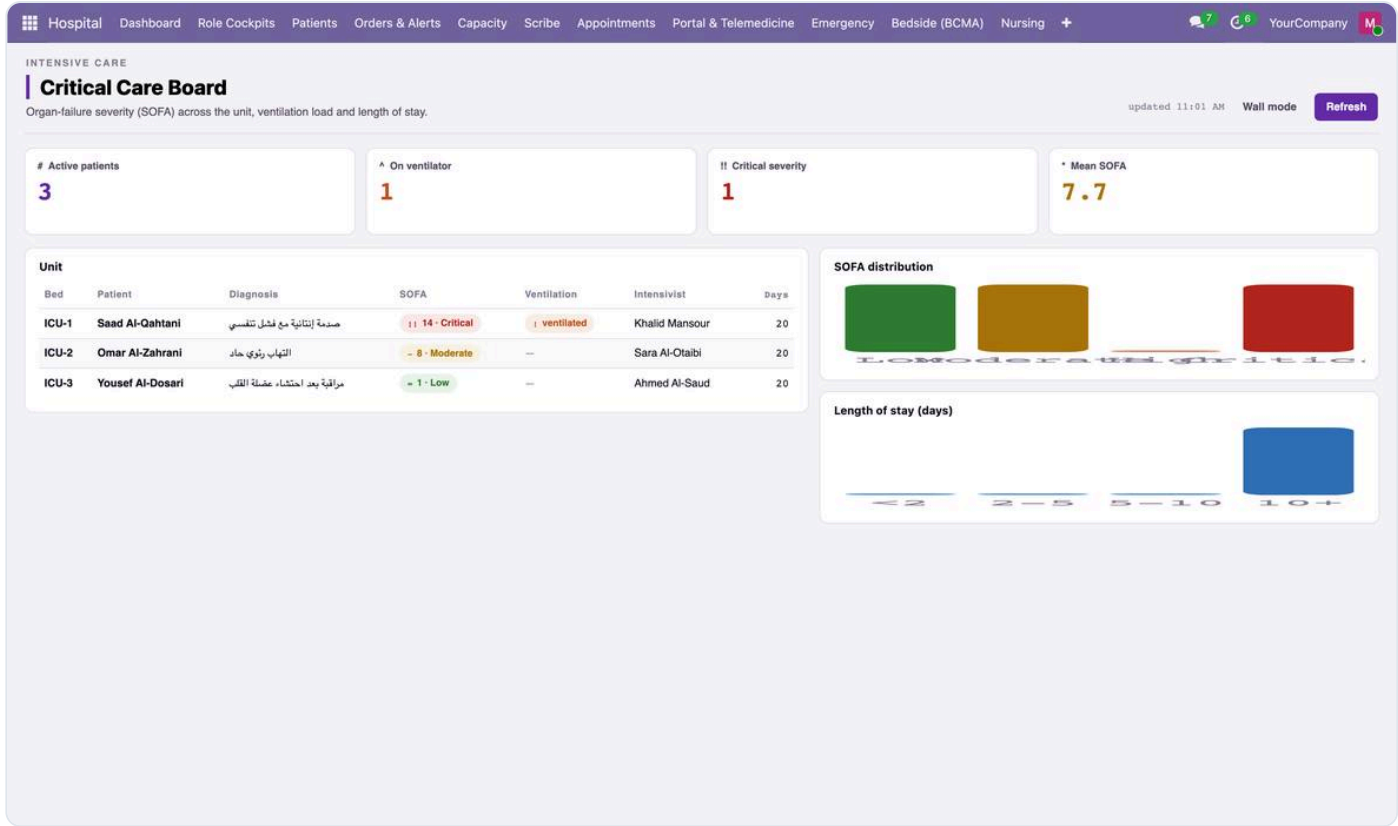

English

ESI triage. The board sorts by acuity and waiting time rather than arrival order, and shows who has breached their triage target.

عربي

الفرز بمقياس ESI. اللوحة ترتب المرضى حسب درجة الخطورة ووقت الانتظار لا حسب ترتيب الوصول، وتُظهر من تجاوز الوقت المستهدف للفرز.

English

عربي

SOFA organ-failure scoring, lines and devices, and the state of every bed in the unit.

درجات SOFA لفشل الأعضاء، الخطوط والأجهزة، وحالة كل سرير في الوحدة.

قائمة اليوم: الغرف، الفرق، حالة كل عملية، وقائمة التحقق الجراحية لمنظمة الصحة العالمية كيوابه لا كإجراء شكلي.
